

EXCLUSIVE  BESPOKE JOINERY

Our Exclusive Laboratory furniture is designed and manufactured to be practical, versatile & durable.

All of our laboratories share our heavy-duty construction techniques and "traditional" standards of finish. We offer a choice of specialised worktop materials such as Texwood Iroko, Trespa and Corian surfaces. We produce a wide range of double and single base units; drawer packs; tray units; fume cupboards; plan chests and tall storage units. All can be finished in a choice of colours. We also supply units finished in real beech, ash, or oak veneers, sealed with long-lasting lacquers. All units incorporate the highest quality gas, electrical trunking, and plumbing fittings.

With competitive price levels, our designs offer the most flexible, efficient and cost-effective solutions to your furnishing needs. We guarantee that all of our product ranges are manufactured to the highest standards using quality materials.

#### Education laboratories

Curriculum, teaching style, and space restrictions dominate the choice of design for a science lab, food science, wood-work, textiles or art room. Planning a refurbishment of an existing room, or new laboratory, requires careful thought and attention with regards to teaching style, access, servicing and flexibility. We can provide a no obligation room design service to transform your ideal concept into a safe, practical teaching environment.

#### Research & Medical laboratories

Despite our high quality levels, we are able to offer highly competitive price levels for both standard and bespoke furniture and fittings. All share our heavy-duty construction techniques and "traditional" standards of finish. We are able to provide a real choice in space planning, work surface specifications and colour combinations. We can tailor a complete design solution to meet your needs.

**EXCLUSIVE**  
COMPLETE FURNITURE SOLUTIONS
